No. 9.

Marion, Crittenden County Kentucky, Thursday Morning, Aug. 31, 1916.

Vol. XXXIX

8 MAGISTRATES OR 3 COMMISSIONERS

Question Will Be Submitted To The
Voters of Crittenden Co.,
Next November.

Shall the fiscal affairs of the County be conducted by three commissioners or eight magistrates?

Petitions are now being circulated to have this question submitted to the people at the coming election. The election will be ordered if 350 voters request it.

The time has come for the people to decide whether the present magistrate system of eight members or a commission consisting of three members is best fitted to finance the county and see that the affairs of the county are judiciously and economically administered.

The law with reference to the proposed change in county fiscal affairs, as amended by the last Legislature is as follows:

"But any county in the Commonwealth of Kentucky desiring it may have three commissioners to be elected from the county at large, who, together with the judge of the county court, shall constitute the fiscal court of said county. To ascertain whether a county desire a fiscal court composed of three commissioners and a county judge, the County Judge of said county upon application by written petition signed by three hundred and fifty of the legal voters of said county, is hereby authorized, empowered and directed to submit to the qualified voters of the county, at the next general election hereafter to be held, the question, 'Whether the fiscal court of the county shall be composed of three commissioners, to be elected from the county at large, and the judge of the county court.' It is hereby made the duty of the county judge, after receiving said petition, to make an order on his order book, directing the officers of the election in all the voting precincts in the county to open a poll to take the sense of the legal voters in the county upon the question above set forth, and to see that the officers of the election at the respective voting precincts in the county are furnished with poll books at said election for the purpose thereof. The clerk of the county court shall furnish the sheriff of said county with a copy of the order made by the judge of said county court on the order book, and the sheriff shall cause the same to be published in all the county papers not less than four weeks previous to the election, and also to advertise the same by printed handbills posted not less than two weeks before said election in a conspicuous place in each of the voting precincts in said county.

In counties wherein no newspapers are published the handbills shall be sufficient notice of the election; the voting to be by ballot, each ballot to have printed thereon the question, 'Are you in favor of the fiscal court of the county being composed of three commissioners to be elected from the county at large and the judge of the county court?'

Said election shall be conducted, the returns made, and the result thereof ascertained and determined in accordance with the provisions of the law governing general elections. The county judge shall determine the sufficiency of the petition presented from the poll book of the last previous general election.

If a majority of the legal voters cast at said election are in favor of the fiscal court of said county, being composed of three commissioners to be elected from the county at large and the judge of the county court, it shall be the duty of the county judge, before the next general election for county officers, to divide the county into three districts as nearly equal in population as possible; and in each district there shall be elected one commissioner by the qualified voters thereof, and every four years thereafter, three commissioners, one from each district, who, with the judge of the county court, shall constitute the fiscal court of the county until otherwise changed by law.

The election provided for therein shall not be held in any county in this Commonwealth oftener than once every

two years."

If you favor submitting this question, clip this out, sign it and send it to the County Atty., T. C. Bennett, Marion, Ky.

To The Judge of The
Crittenden County Court

I am a legal voter of Crittenden County and respectfully petition you to order an election and have submitted to the qualified voters of Crittenden County at the next November (1916) general election, the question, "Whether the fiscal court of the county shall be composed of 3 commissioners from the county at large, and the judge of the County court."

Bacon Fry For Miss Pickens

Miss Ella Williams gave a most enjoyable bacon fry and picnic at the new lake Tuesday evening for her house guest, Miss Elvah Pickens of Marion, and the following young people thoroughly enjoyed her hospitality: Misses Pickens, Rezella Clinton of Providence, Amelia Coit, Iva Stanley, Wilma Thomas, Lillian Cox, Sanna Bailey, Lora Bell, Eva Bell, Ruth Hearin, Julia Holloman and Amy Williams. Messrs Peyton Williams, Homer Belt, Trice Bell, Harrison Clement, Harrison Holloman, James Sory, Chas. Nesbit, Bradley Stone and Aubrey Thomas. The party was chaperoned by Mrs. V. Y. Moore, Mrs. Ben Slaton and Mrs. C. S. Williams. —Madisonville Messgr.

Graveyard Cleaning

The graveyard at Mt. Zion will be cleaned off Friday Sept. 15th. All interested are invited and expected to be present with tools and dinner prepared to spend the day in order that the city of the dead may be beautified.

J. B. Hughes, Committee.

New Manager For Produce Firm.

When in town bring your produce to S. Moskowitz Co., and get highest cash prices for hides, feathers, eggs, chickens and butter. I am buying for the above firm and will appreciate your trade. The old place back of the Masonic building.

H. Koltinsky,
Manager.

Notice To Taxpayers.

It is now time to begin making the assessment again. The law requires that each tax payer give a full and complete list of all taxable property in his or her possession on September 1st. I want to ask that each tax payer make an invoice on Sept. 1st, of all taxable property, valuing it at a fair cash value, estimated at the price it would bring at a fair voluntary sale, and note it down on a piece of paper so you will have it ready when I call on you.

Upon investigation I find that the Dog Tax Law was not repealed as was reported, so please remember that all dogs over four months old, on Sept. 1st, will be subject to taxation, and if you do not want to pay taxes on them, please get rid of them before that time.

Yours truly,
C. G. THOMPSON,
Assessor.

Farm For Sale

100 acres near Mattoon, some fruit, some grass, well watered. Good house, barn and stable. A bargain on easy terms.

A. R. Nunn.

TEACHER'S ASS'N AT BETHEL.

Division No. 2, Met With a Good
Attendance—Was Very Beneficial to Teachers

The Teachers Association of Division No. 2 met at Bethel School house on Friday Aug. 18.

Exercises were opened by song after which devotional exercises were conducted by Mr. P. M. Ward.

The first subject discussed was "Why we have Teachers Associations" by Mr. F. H. Hilliard, saying the Associations are to get the teachers all together that they may discuss school plans for the year.

"Some plans for securing the interest of the parent" was next discussed by Mr. Geo. W. Condit. He said that the best way to secure the interest of the parent, is to get well acquainted with them, and by efficient school work.

Miss Emma Terry made an interesting address on the subject of "Domestic Science in the Rural School" saying it should be taught as it would give the women of the future a better and easier way of performing their household duties.

"Why teach Agriculture in the Rural School" was discussed by Mr. Elbert Thomas. He says it not only helps us to demonstrate what we teach but it also helps the children to observe the different kinds of soil. This subject was also discussed by some of our trustees.

At 12 o'clock the people were invited to partake of the splendid dinner which was prepared by the good people of Bethel and other places, which was certainly enjoyed by everyone present.

At 1:30 p. m. the Association was called to order by Vice Pres't. Homer Davidson and after a song, the crowd was entertained for a short time by a "Reading" by Miss Myrtle Thomas.

"Plans for the County School Fair" was next discussed by our County Supt. Mr. E. J. Travis, urging every one to begin making plans for the School Fair and make the year 1916 the best we have ever had.

Miss Iva Hicklin entertained us for a time with a story which was enjoyed by both young and old.

"The Value of the Stay in the Primary Grades" was next discussed by Mrs. Fred Hillyard. She says the "Story" is of great importance as it will get the children's attention when other things would not.

Miss Margaret Moore made a splendid talk on "Our Crittenden County of the future." She thinks Crittenden is not what it ought to be yet, but it could and would be better in the future.

Prof. V. L. Christian told us about "Our County High School" and how important it is to get the boys and girls of our county ready for high school.

"How the teacher can help the High School" was discussed by Mr. F. H. Hilliard and also by Prof. H. C. Franklin. They said the teacher could help High School by first improving herself and then by inspiring her school.

"How athletes may help the school" was discussed by Mr. O. K. Hamby and several others who said that athletics not only help to develop the muscles of the children but it makes them feel like taking up their studies

when they get back in the school room.

"How to keep the big boys in School" was discussed by Mr. J. C. Hardin and Mr. H. C. Franklin. They said give the big boys some important work to do and keep them interested in that way.

Misses Wanda Marvel and Reba B. bout discussed the subject of "How to make the Language work Interesting", which was by the use of sentences and by memory work.

"Manual Training in the Rural School" was discussed by Mr. E. Hardin and Prof. V. L. Christian. They said the way to have Manual Training in the school would be to get the necessary tools and benches and let the pupils have a certain work to do.

Miss Della Belt discussed the subject of "Entertainment," Some forms of entertainment for the children would be Reading Matches, Recitations, Arithmetic Matches, and etc.

There was a splendid attendance of teachers, there being only two of Division 2, teachers absent, and we are very sorry they were not there. And we were certainly glad to see as many trustees present as were, and we hope to make this a profitable "School Year."

Mary E. Hurley,
Secretary.

Hampton Meeting

The Baptist Prayer meeting of the Ohio River Association met with Hampton church, Tuesday, August 22th, 1916.

The meeting was called together by Eld. E. W. Barnett, Mod., Eld. R. A. Barnes read from the 11th chapter of Luke and Eld. H. C. Paris offered prayer.

Several of the pastors made fine reports of their work on various fields.

A great deal of interest was manifested and a fine spirit prevailed. Many requests were made for special prayer and many prayers offered.

This body meets four times a year. Our next meeting will be with Fredonia church, Dec. 5th. Let all pastors, deacons and others, who are interested in the cause of our Master, be present. Eld. U. G. Hughes, Sec'y.

M & F. Academy

Providence, Ky.

The M. & F. Academy will open on Monday, August 28, and continue nine months.

For years it has been our constant aim and effort to make this institution one of the most desirable in Western Kentucky, and we believe we have succeeded in so doing.

The general plan of the year's work is such that students may pursue all the branches belonging to the work of the Eighth Grade, in the time allotted, without being compelled to pursue more than six studies at a time. Students are thrown on their own resources and taught in a way to inspire self-confidence.

The active and spirited discussions brought about by a lively general interest make it worth while to attend this school.

This institution is under a discipline that makes it in all respects one of the best little schools in the State for Seventh-Grade and Eighth-Grade students.

In order to get the best results possible, students should enter the first day of school. Nothing more important.

J. Y. BROWN,
Prin. M. & F. Academy.

SAD DEATH OF YOUNG GIRL

Miss Selma Moore Dies Very Unexpectedly After Only Few Days' Illness

Toxic poisoning, appearing most unexpectedly and working rapidly despite the efforts of physicians, caused the death, about 7:30 o'clock Wednesday night of Miss Selma Moore, grand-daughter of Judge and Mrs. James A. Moore with whom she made her home. Just what caused the poison to form in her system is not known. She had not been feeling well since the Saturday before, but neither she nor the family attributed any serious nature to her indisposition and she was up and active as was her wont. Tuesday afternoon about 4 o'clock she was suddenly taken violently ill and when a physician was called he realized the gravity of her condition. Another physician was called that night to assist but she lapsed into unconsciousness in a few hours and her decline from then until the end was rapid and steady.

The funeral services were held at 4 o'clock Thursday afternoon at the home and the house and yard were filled with the sincerely sorrowing relatives and friends and a great number of beautiful floral offerings testified to the love felt throughout the community for this bright girl. Interment was in the Moore lot in the new cemetery. The services at the house and grave were conducted by Rev. J. A. Chandler, of the Methodist church.

Selma was in her sixteenth year, she being born near Atoka, Oklahoma, on March 19th, 1901.

Her parents were Robert M. Moore, oldest son of Judge and Mrs. Moore, and Olive Hebert Moore. She was the third of five children born to that union. Mr. Moore was accidentally killed 1908 and the mother died a few months later leaving the children orphans. The two boys, Hebert and Sylvan, were taken by their grandparents to care for and the girls, Lucile, Selma and Carrie, were for a time in St. Xavier's academy in Denison, Texas, but in May, 1911, they too were brought to Marion and the family circle made complete again. The death of Selma is the first break in it since then.

Selma was an exceptionally attractive girl, both in personality and characteristics. She was of a rather retiring disposition and preferred the quietude of home and to be comforting and aiding her grandparents in their household duties, to the pastimes, which allure so many girls of her age to other places. In this she was one of their strongest supports and greatest joys.

But her popularity did not stop there for her alma mater, minister to others or to her kind, her innate womanliness and gentleness all made her a favorite with everyone whom she came in contact. Since coming to Marion she had professed religion and had joined the Methodist church. She was faithful to all her vows and lived day by day a true Christian life, and took a deep interest and pleasure in the various services of the church and especially those for the young people.

In the beautiful talk which he

made at the funeral services, Rev. Mr. Chandler used in his text, "The gardener hath gone down into his garden to gather lilies." From this he likened Selma to a beautiful lily planted and nurtured in this world by God himself until the time came when the Omnipotent, himself saw fit to call her home. And there was not a person in the large crowd which heard this comparison but who agreed fully that in the death of Miss Selma Moore the town of Marion had lost one of its most lovable girls.

Great Crowd at Graveyard Cleaning

Thurmond grave yard cleaning at Repton Friday drew a large crowd probably 300 people. Good work was done on the city of the dead and it was left in a fine condition. At the noon hour a grand dinner was spread and it was a regular love feast. Rev. J. R. King preached his 15th annual sermon in the afternoon.

Stricken With Paralysis, Dies

James Travis who was stricken with paralysis Monday Aug. 21, died at midnight a week later. His remains were buried at the Wheeler graveyard Tuesday afternoon. He leaves a wife and eight children. His father, Wm Travis and mother survive, also several brothers and sisters.

Announcement to the Public

In a few days I will open a store in Marion, in Morris' old stand next to the Masonic Hall, with a new, complete and up to date stock of Dry Goods, Shoes, Ladies and Gents Furnishing etc. All goods strictly new, direct from the Eastern markets.

Will ask the people of Marion and vicinity to give us a call, we would like to get acquainted.

The Globe Store.

A. Blacker, Prop., Marion, Ky.

Ever Notice It?

If you stop to think, you can doubtless name a number of people who talk too much—including yourself.

M. E. CONFERENCE AT FRANKLIN, KY

Convenes September 27--Many
Changes Necessary in
Pastors to be Made

There will be more changes in pastors of Methodist churches in the Louisville district the coming year, according to Rev. William P. Baird, pastor of the First Methodist church in this city, than for a number of years. This is due, Mr. Baird stated, to the fact that more pastors have served their four year limit.

Continuing, Mr. Baird said the assignments this year would be problematical, due to the fact that in many cases pastors who have not served their four-year limit will have to be changed in order to give way for pastors who have served their allotted time.

The Louisville conference of the Methodist church, which will convene at Franklin, Ky., on Wednesday, Sept. 27, for a five days session.

The last quarterly conference of the First church will be held on September 20, when final reports will be made of the year's work.

One of the important matters to come before the conference at Franklin will be the proposed union of the northern and southern branches.

BARKER ATTACKS APPOINTEE PLAN

Student: Receive \$5,000 Annually For Railroad Fares

Lexington, Ky., August 28.—In the belief that the Kentucky statue providing for county appointments to the University of Kentucky is unconstitutional, President Henry S. Barker, of the university, has asked Attorney General Logan for an opinion. The question at issue is whether the statue provides for illegal discrimination in favor of the students who avail themselves of the opportunity to accept the appointment. The attorney general will give his opinion in writing and a test suit may be filed to determine the law.

If the section is declared unconstitutional, about 300 students of the university will be affected and about \$5,000 saved annually for the state. County appointees receive free rooms at the university dormitories and have their railroad fares, both ways, refunded at the end of the school term each year. The law provides for appointments after competitive examination in the various counties of the state by the county superintendents. Receipts for railroad fares are filed at the beginning of the year with the university business agent. The system has been in effect for 20 years, in which time a considerable sum of money has been returned to students by the state. Tuition at the university is now free to all, whether county appointee or not.

FOR SALE

My farm 4 miles North east of Marion 81 acres on Rural Route Lev-land, 30 acres in grass, 2 acres in timber balance in good state of cultivation, well watered good orchard, tobacco barn, stock barn, well fenced, terms easy.

She Went Into A Bee Nest To Don Her Bathing Suit.

Camden, N. J., Aug. 27.—Physicians at Cooper Hospital did their very best to soothe Miss Margaret Gilhooly, eighteen, of No. 923 Judson street, Philadelphia, when she appeared there yesterday afternoon. It took dozens of lotions, for her body was covered with the punctures of yellow jackets. The girl has gone to the National Park with friends. In the woods she was changing her street wear for a bathing suit, and she stepped into a nest of the insects. She said it seemed to her though a thousand jets of live steam had been turned on, each jet with a needle, and each needle charged with tobacco sauce. She did not go in the water. The doctors say she might forget the experience in about nine years.

For Sale

Eight room house, in good repair, large lot, good stable and all necessary outbuildings. Plenty of water and fruit. Adjoining High School property. Will sell cheap. G. R. Bibb, Marion, Ky.

"Cured"

Mrs. Jay McGee, of Stephenville, Texas, writes: "For nine (9) years, I suffered with womanly trouble. I had terrible headaches, and pains in my back, etc. It seemed as if I would die, I suffered so. At last, I decided to try Cardui, the woman's tonic, and it helped me right away. The full treatment not only helped me, but it cured me."

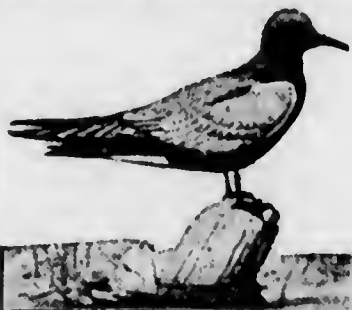

TAKE

Cardui
The Woman's Tonic

Cardui helps women in time of greatest need, because it contains ingredients which act specifically, yet gently, on the weakened womanly organs. So, if you feel discouraged, blue, out-of-sorts, unable to do your household work, on account of your condition, stop worrying and give Cardui a trial. It has helped thousands of women,—why not you? Try Cardui. E-71

BLACK TERN

(Hydrochelidon nigra surinamensis)

Length, ten inches. In autumn occurs as a migrant on the east coast of the United States, and then is a white and gray plumage. During the breeding season it is confined to the interior, is chiefly black, and is the only dark tern occurring inland.

Range: Breeds from California, Colorado, Missouri, and Ohio, north to central Canada; winters from Mexico to South America; migrates in the eastern United States.

Habits and economic status: This tern, unlike most of its relatives, passes much of its life on fresh-water lakes and marshes of the interior. Its nests are placed among the tules and weeds, on floating vegetation, or on muskrat houses. It lays from two to four eggs. Its food is more varied than that of any other tern. So far as known it preys upon no food fishes, but feeds extensively upon such enemies of fish as dragonfly nymphs, fish-eating beetles, and crawfishes. Unlike most of its family, it devours a great variety of insects, many of which it catches as it flies. Dragonflies, May flies, grasshoppers, predaceous diving beetles, scarabaeid beetles, leaf beetles, gnats, and other flies are the principal kinds preyed upon. Fishes of little economic value, chiefly minnows and mummichogs, were found to compose only a little more than 19 per cent of the contents of 143 stomachs. The great consumption of insects by the black tern places it among the beneficial species worthy of protection.

HUSBAND SAVED HIS WIFE

Stopped Most Terrible Suffering by Getting Her Lydia E. Pinkham's Vegetable Compound.

Denison, Texas. — "After my little girl was born two years ago I began suffering with female trouble and could hardly do my work. I was very nervous but just kept dragging on until last summer when I got where I could not do my work. I would have a chill every day and hot flashes and dizzy spells and my head would almost burst. I got where I was almost a walking skeleton and life was a burden to me until one day my husband's step-sister told my husband if he did not do something for me I would not last long and told him to get my medicine. So he got Lydia E. Pinkham's Vegetable Compound for me, and after taking the first three doses I began to improve. I continued its use, and I have never had any female trouble since. I feel that I owe my life to you and your remedies. They did for me what doctors could not do and I will always praise it wherever I go."—Mrs. G. O. LOWERY, 419 W. Monterey Street, Denison, Texas.

If you are suffering from any form of female ill, get a bottle of Lydia E. Pinkham's Vegetable Compound, and commence the treatment without delay.

CHEAP POWER VITAL TO NEW INDUSTRIES

How Modern Business Depends on Electrical Products.

In the recent discussion of the water power problem in and out of Congress, public attention has been directed toward the use and value of electricity for motive power and for lighting, and latterly, for the manufacture of fertilizers and nitric acid for explosives. But these are only a few of the growing demands for cheap power.

Today the great steel mills of the United States are absolutely dependent upon the products of the electric furnace for alloys. The automobile manufacturer is dependent upon another electric furnace product—aluminum—for car bodies. The manufacturers of steel products need these materials for making tools, and countless factories require abrasives which can not now be imported, and which are produced in the United States only by electric processes. Without acetylene gas and graphite, also electric products, many industries would be crippled.

Turning to the products of electro-chemistry, it is found that the surgeon and the doctor look to electric plants for chloroform and disinfectants; the cotton and the paper manufacturer need the bleaches produced by this magic element; every user of soap patronizes an electro-chemical establishment, as does every user of matches. Gold and silver mining of the West requires electric products to assure a profit, and of late it is learned that the United States, cut off from its supply of German dyes, finds itself dependent upon other electric products to supply, in part, the deficiency.

These are but a few of the industries depending upon cheap power for success. The power is here. Its development, when encouraged by the passage of such bills as are now before Congress, will make the United States independent of foreign sources of supply, and will reduce the cost to the consumer of countless articles of every-day use which, to his mind, are probably in no way associated with hydro-electric development.

The manufacture of steel is the greatest of all American industries, and better steel is made in electric furnaces than by any other known process. Today electrically produced ferro-alloy is used as an alloy by most steel manufacturers, with the result that the Bessemer process is fast becoming obsolete. The essential element in the manufacture of armor plate and armor-piercing projectiles is introduced into steel by ferro-chromium, an alloy which is strictly an electric furnace product. The Navy Department calls for this type of steel, and will have no other as armor plate. Without this alloy our battleships of recent date would be at the mercy of a hostile fleet, and the shells fired by our warships and coast-defense guns would be ineffective against the armor of a modern enemy fleet.

Ferro-chrome, another product of the electric furnace, has made possible the manufacture of high-speed tools, which have tripled the capacity of every machine shop in the world, and enhanced the efficiency of every mechanic. It has done this by the capital investment in tools to accomplish a given volume of work.

In the absence of chromium, tungsten, vanadium and molybdenum, all alloys made by electrical processes, the United States could not build modern battle ships and other weapons of national defense, and a large proportion of our steel and metal working industries and other industries would revert to the conditions of twenty years ago. The electric industry itself is largely dependent upon silicon steel, which does not age and does not wear out.

There is no manufacturer of automobiles but who is today heavily dependent upon aluminum. The making of automobile bodies utilizes more of this electrically produced metal than does any other line of industry. The development of aeroplanes also calls for aluminum, and only with the constant production of cheap water power can the price of aluminum kitchen utensils be brought within the reach of every household.

At the outbreak of the European war the United States was cut off from the supply of Greek and Turkish emery. Today the metal working industries of this country are dependent absolutely upon electric furnace abrasives, carborundum and aluminum. The manufacturer of agricultural machinery, locomotives, fire-arms, milling machinery, automobiles, and countless other metal products must have these abrasives and they can now be made only where water power is developed cheaply. Cut off the artificial abrasives and force the automobile manufacturer to go back to the grindstone, at the same time eliminating the other products of cheap power—aluminum, high-speed steel, and special steels—and works which produce 500 cars per day would be able to turn out less than 100 cars every twenty-four hours with the same force of workmen. This would mean an increase of price that would drive thousands who now employ and enjoy them.

The electric furnace also turns out calcium carbide, the only source of acetylene, without which many homes would still use the kerosene lamp. The oxy-acetylene flame has become of immense value in the welding of metals and the cutting of steel. This and

Maxwell

\$595

F.O.B. DETROIT

Maxwell motor cars have demountable rims and the same size tires on both front and rear wheels.

REMEMBER these important features, because they are not to be found on some of the lighter cars. Maxwell cars have 3 1/2 in. tires all around. This is a generous size. The tires are not overtaxed. They last longer and make riding easier.

Tires of one size mean that you have to carry only one size casing and one size tube.

Demountable rims, of course, are recognized as the best. They are on all good cars. Don't buy any car without demountable rims. If you do, you'll regret it.

These two features—along with the other complete and up-to-date equipment; the economy and proved endurance of the Maxwell, make it the greatest automobile value in the world today.

Story Is Submitted For Approval.

Efficiency in the post office department with a proper read adjustment of rates will permit the government to inaugurate a one cent letter rate within the next year, according to Postmaster General Albert S. Burleson.

This emphatic statement by the postmaster general before the National Association of Postmasters of the United States at their July 1918 convention, indicates that this important reform is much nearer realization than most people believe and that the next winter will see radical steps taken toward this end.

In addressing the postmasters General Burleson declared that they are giving the postal service in the world today, and that is what the American farmer and business man are entitled to for they pay for it. He advised the postmasters to spare no expense that means greater efficiency.

"But that does not mean extravagance," said Mr. Burleson. "Where is an official who will tell me that employees. I believe the government should require only a certain number of hours work, and that under sanitary and comfortable conditions at a salary, not only adequate, but generous. It is my purpose and your duty to see that all employees perform an adequate service for the money extended."

"Every dollar intelligently

saved can be utilized for the improvement, development and extension of service, resulting in a reduction in postage for those served."

"Plans are being worked out for the solution of railroad mail service problems. They are being solved in a way that will enable the United States to pay the railroads adequate compensation for service rendered, and pay only for service received."

With this result, if next year we can make those of the second class mail service pay a one-half part of what they should, we can go before Congress and take the first step toward penny postage. "The fact that this year we have a surplus of between \$1,000,000 and \$5,000,000 demonstrates that at least the postal service is of a strong business and self-supporting basis. If we can keep down the useless extra charges we can soon inaugurate a one cent postage in this country."

This frank statement from the postmaster general and his associates, which have been made during the past year or two by officials of the National One Cent Letter Postage Association, is one of the most important which has been put forward in Cleveland, with the economical operation of the department and a reasonable adjustment of postal rates, one cent letter postage could be inaugurated without injury to the federal government, and letter users gives the benefit of a big reduction over current rates.

Nearly sixty bills were presented at the present session of Congress, leading for one cent letter postage. Scores of representatives and senators have been closely studying the matter and have been united in a conviction that the time is ripe for one cent postage, a reform sought for many years but only recently brought to the attention of Congress through the persistent campaign on the part of the National One Cent Letter Postage Association.

At the present time letter users of the United States not a profit to the government of over \$75,000,000 a year over actual cost of distribution. At the same time large magazine interests are securing distribution of their product at one cent a pound which means a great loss to the government, and to make up this loss users of letter postage are paying a rate of 100 per cent. It is correct that great is the benefit that the postmaster general and his associates have made during the past year or two by officials of the National One Cent Letter Postage Association, is one of the most important which has been put forward in Cleveland, with the economical operation of the department and a reasonable adjustment of postal rates, one cent letter postage could be inaugurated without injury to the federal government, and letter users gives the benefit of a big reduction over current rates.

At the present time letter users of the United States not a profit to the government of over \$75,000,000 a year over actual cost of distribution. At the same time large magazine interests are securing distribution of their product at one cent a pound which means a great loss to the government, and to make up this loss users of letter postage are paying a rate of 100 per cent. It is correct that great is the benefit that the postmaster general and his associates have made during the past year or two by officials of the National One Cent Letter Postage Association, is one of the most important which has been put forward in Cleveland, with the economical operation of the department and a reasonable adjustment of postal rates, one cent letter postage could be inaugurated without injury to the federal government, and letter users gives the benefit of a big reduction over current rates.

BEST EATING PLACE IN TOWN

The Louisville Hotel and the Old Inn are located in the wholesale district and only a three-block walk to the retail district and the theatres.

LOUISVILLE HOTEL AND OLD INN COMPANY, PROPRIETORS

LOYD' BRAIN LEAKS.

By F. S. LOYD.

Dr. Bunton says, Even a doctor who needs the money will admit that the best prescription he can write, "is take less medicine and more exercise."

Taylor Stokes says, If it takes a one-armed nigger with a wooden leg a right smart spell to set a good sized tobacco patch; counting 49 plants to the square rod, how long will it take a cross-eyed woman with a hair-lip to blow all the ashes out of a fire-place?

George Crider says, That it doesn't take much noise to arouse suspicion.

Guy Rice says, When father stays at home all evening and doesn't act like a fish out of water, mother knows that he is either broke or sick.

Mrs. Oakley says, One good thing about Carlons, is at meal time, is that he never kicks because the tablecloth is soiled.

Oscar Hibbs says, A girl would rather have corns than pimples because you can't see the corns. But a man has more sense. He knows that you do not have to walk on pimples.

Albert Elder says, The reason why a woman is a woman, is because she will spend an entire month making up her mind about something and then go and do something different.

Oscar Hibbs says, It doesn't matter how long you have been married your wife gets just as mad when she sees you talking to a pretty girl, as she did when she was first married and didn't have a grain of sense.

Taylor Stokes says, If you hear a man swear while trying to button his shirt collar, is not to be regarded as a symptom of softening of the brain.

Carlons Oakley was heard to say: "Pa, where was the first talking machine made?"

"In the garden of Eden, my son."

"You see, father, Adam was lonely—"

And Mrs. Oakley said: "Carlons, you go out and busy with the lawn mower."

Senator Deboe says, When the devil can't get you to lie about other things, he gets some friend to ask you if you are afraid of your wife.

Albert Elder says, When we were first married everything in the house is referred to, as ours. But a little later is referred to, as everything in the house as mine.

David Woods says, A pastor asks the Creator for advice. But an evangelist tells the Creator what to do.

IS YOUR BLOOD GOOD OR BAD?

GERMS EXPELLED FROM THE BODY.

Twenty-four hours after you start to take Dr. Pierce's Golden Medical Discovery, poisonous matter and blood impurities begin to leave your body through the liver, bowels, kidneys and skin.

It brings new activity to the liver, stomach and bowels in a short time, thus causing ruddiness, indigestion and constipation to disappear.

Good blood means good health; good health means strong men and women, full of vigor and ambition, with minds alert and muscles ever willing. Any medicine dealer will supply you with Dr. Pierce's Golden Medical Discovery in either liquid or tablet form.

Longmont, Ky.—"Two years ago I was taken with a pain in my right side. It kept getting worse until I could not sit up or feed myself so they called a doctor for me. Matter formed in my right side and the doctor said I would have to be operated on before I would ever get well. I would not give up for it to be done. I wrote to Dr. Pierce for advice. My treatment consisted of Dr. Pierce's Favorite Prescription and Golden Medical Discovery. At first I felt worse, but was determined to give the medicine a fair trial, and was rewarded by feeling a vast improvement, and to-day I am in perfect health. In all I used eight bottles. I cannot praise your medicine too highly."—Miss Corbetta P. REEDMAN.

NO CHARGE FOR THIS BOOK.

Send three dimes (or stamps) to pay for wrapping and mailing and receive this action, and Dr. Pierce's "The Invalid's Friend," a book of 112 pages, with order plates. Just what you need in case of stomach or bowels. Treats of Dyspepsia, Anemia, Protrusion, Marriage relations, Hygiene, etc., etc.

Hogs Sell at New High Record Price.

Chicago, Aug. 22.—Hog prices surpassed all previous records here today when light prime butchers sold at \$11.25, 5c higher than the record established in 1910. Medium butchers sold at \$11.10 at Peoria, a high record for that market.

Pittsburg, August 22.—Hogs reached \$11.40 a hundred in the market here today, \$3.00 higher than for the corresponding day of last year.

Indianapolis, Aug. 22.—Soon after the opening of the local stock market today, hogs sold at \$11.30 a hundred, the highest in the history of the yards. The previous high quotation was made March 25, 1910, when hogs sold at \$11.20.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional medicine. Deafness is caused by an inflammation of the mucous lining of the Eustachian Tube. When this tube is inflamed, you have a running ear or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and the tube restored to its normal condition, hearing will be destroyed forever; since cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of deafness (caused by catarrh) that cannot be cured by Halls Catarrh Cure. Send for circulars free.

J. J. CHENEY & CO., Toledo, Ohio.

Sold by Druggists. Take Halls Family Pills for constipation.

Printers See Idleness

In Paper Shortage.

Baltimore, Aug. 29.—The danger that thousands of printers may be thrown out of work because of the high cost of white paper was said so be a question seriously concerning the delegates to the sixty-second annual convention of the International Typographical Union, which begins here next Monday.

BOULD SLOAN'S LINIMENT GO ALONG

Of course it should! For after a strenuous day when your muscles have been exercised to the limit an application of Sloan's Liniment will take the soreness and stiffness away and get you in fine shape for the morrow. You should also use it for a sudden attack of toothache, stiff neck, back ache, sting, bites and the many accidents that are incidental to a vacation. "We should as soon leave our baggage as go on a vacation or camp out without Sloan's Liniment." Writes one vacationist: "We use it for everything from cramps to toothache." Put a bottle in your bag, be prepared and have no regrets.

Germans are Rushing

To Defense of Trieste

Haris, August 27. It is reported that Germany is taking over the defenses of Trieste, sending troops especially organized for that purpose, says a dispatch to The Temps from Milan today.

Farm For Sale

74 acres 4 miles north of Marion on Crooked Creek; well fenced, fairly good 2 room house, new tobacco barn, 25 acres in clover and grass, some fruit, two ponds and a spring, some timber a bargain for cash.

W. D. Hunt, R. F. D. No. 4.

Reports Methods of Saving

Chicago, Aug. 29.—Publishers of Chicago papers met today to discuss the white paper situation. Reports from individual publishers shows that in Chicago economy in size of paper and distribution have been practiced for the last few months, but various other methods of savings were reported which will release several hundred tons of paper weekly to relieve the general situation.

Fair Warning

The cost of print paper has doubled. We will accept renewals or new subscriptions at \$1.00 while our stock bought before the advance, lasts but no papers not paid for will be mailed.

The Crittenden Record-Press.

The Quinine That Does Not Affect The Nose Because of Its Local and Laxative Effect, LAXATIVE REMEDY QUININE is better than ordinary Quinine and does not cause nervousness or tingling in head. Remember the full name and look for the signature of E. W. GROVE, 28 Duane.

THE TRAGEDY OF HUGHES

"Where is Hughes gone? The Hughes of 1908?" The New York World undertakes to answer that question, which the Democrats are asking themselves with astonishment; which the Republicans are asking themselves with bewilderment and disgust. Thus the World answers:

"The Hughes that New York used to know, the Hughes whom the World supported in 1906 and in 1908, has disappeared. In his place we have a Hughes of the Penrose-Cannon-Gallinger type, whose mind never arises above the petty partisanship of Republican organization politics."

"No other candidate for President within the memory of living men ever ran down hill so rapidly as Mr. Hughes has done since the day following his nomination. It is both the campaign sensation and the campaign mystery of the country. Wherever men talk politics the one question is, 'What has happened to Hughes?'"

"No body has answered that question; yet it admits of an answer—and the explanation can be found in Mr. Hughes' Chicago speech when he said: 'As I was on the bench 100 per cent, a Judge, I then became 100 per cent, a candidate.'"

"That is where the Hughes of 1908 has gone. He has disappeared in the Hughes of 1916, who is 100 per cent, a candidate. The country thought the Republicans were nominating a great leader who was still 100 per cent, a Judge, with all of that implied—a leader who was wise, just, fair, learned, honest in all his statement; upright in relation to all the great issues of the campaign and fearless in his discussion of them. Instead they suddenly find a man who has changed himself from 100 per cent, a Judge into 100 per cent, an office seeker, with all the disingenuousness, with all the evasions, with all the dodging and twisting and elaborate misrepresentation that usually characterize the 100 per cent, office seeker. Hughes the Judge and statesman has been swallowed up in Hughes the candidate."

"That is where the Hughes of 1908 is gone."

The Hughes of 1916 is merely a puritan aspirant for office. He assails President Wilson, but he has no policies of his own. He abuses his opponent, but he offers no construction programme. He has even forgotten the courtesy that ought to exist between opposing candidates for President.

"The Hughes of 1916 sneers at President Wilson's successful efforts to keep the country out of war with Germany, but he is afraid to say what he would have done that the President did not do, or what he would have left undone that the President did. He ridicules President Wilson's efforts to bring a new order of things out of the Mexican chaos, but he dare not say what his own Mexican policy would be. He makes boastful professions about his devotion to 'America First,' but encourages the German vote to support him in order to punish the President for refusing to yield to the Kaiser. He accuses the President of 'vainglorious and timidity' in dealing with the gravest national and international problems with which any other President except Lincoln has had to grapple, but he lacks the moral and political courage to say how he would meet the situation."

"In the midst of the greatest crisis known to modern history, the most important issues in Mr. Hughes' mind are the substitution of a Democratic Director of the Census for a Republican Director of the Census, the appointment of a son of Battery Dan Finn to a place in the customs service and the failure of the President, occupied with matters of the first magnitude, to keep all the petty pork out of a Rivers and Harbor Bill. It is like abusing Abraham Lincoln because the streets in Washington were not better paved during the Civil War and declaring that in consequence his Administration was a failure. . . . He is trying to pussyfoot into the presidency under the guidance of the Old Guard Republicans. He takes his political advice from them, just as he takes his campaign fund from Wall street. He takes his campaign information from them. He makes the kind of speeches that they tell him he ought to make. They warn him not to try to present constructive policies of his own lest he be compelled to defend them, and he obeys. . . . Mr. Hughes has pitched his campaign in the lowest key of partisanship and is appealing only to party prejudice and party passion. Instead of being the Republican candidate for President he might be a Republican candidate for Assemblyman."

The World answers well the question, 'What has happened to Hughes?' But it is mistaken when it says nobody has answered that question before. The Courier Journal answered it the morning after the delivery of his speech of acceptance, the chief significance of which was its revelation that the man whom the Republicans had offered for the presidency was not the man they thought they were offering, not the man whom the country had

conceived him to be and whom it delighted to honor in that conception; that the Hughes of silence was an ideal of the popular imagination—an ideal which he himself shattered when he broke his silence.—Louisville Courier Journal.

To Whom It May Concern.

Miss Evalyn Clement attended the Bowling Green business University several months during the winter and spring of this year and it was my pleasure to have her in some of my classes.

She was easily one of the most capable of my students efficient both in the technical and general education. There is no question about her thorough knowledge of the principles of Gregg shorthand. She makes excellent forms, knows every detail of the technique of shorthand and of Typewriting, and has energy and personality enough to teach these subjects effectively.

Respectively,

J. L. HARMAN.

Vice Pres.

Miss Clement will start a shorthand and typewriting school in this city and all interested in this work should see her at once.

MAYR'S WONDERFUL REMEDY FOR STOMACH TROUBLE

Gall Stones, Cancer and Ulcers of the Stomach and Intestines, Auto Intoxication, Yellow Jaundice, Appendicitis and other fatal ailments result from Stomach Trouble. Thousands of Stomach Sufferers owe their complete recovery to Mayr's Wonderful Remedy. Unlike any other for Stomach Ailments. For sale by Haynes & Taylor, Marion, Ky., and druggists everywhere.

Glendale

Miss Sallie Minner, of Morley, Mo., and Miss May Belle Minner, of Sheridan, visited the Misses Moores and Mrs. Ima Clark last week.

Quite a good many from this section attended the Teachers' association at Bethel.

Misses Mary and Sue Moore visited their brother, R. C. Moore, near Crittenden Springs last Sunday.

The following named families expect to camp for the ten days meeting at Hurricane: P. C., W. C., and J. H. Moore, R. H. Thomas, F. M. Jacobs, Tom Miller and possibly others.

Mrs. Sarah Hurley who has four sons living in Illinois, and one son and two daughters in this county and one daughter in Livingston Co., but who resides with her son, Oscar, at Equality, Ill., is visiting W. M. Hurley at this writing.

On account of the Hurricane camp meeting, there will be no Sunday school at this place the next two Sundays.

One day last week Robert Thomas took Mr. and Mrs. Geo. Tucker to Crayne, where Mrs. Tucker—who has been an invalid for a long time—will take a treatment from Dr. Sory, of that place.

Bro. Ross Gass preached here last Saturday night. As we have said before, he is a splendid young man and needs the prayers and a word of encouragement from all christian people as do all ministers of the gospel.

Clifton Enoch went to Mattoon, Ill., last week to work for a telegraph company.

Frank Belt went to Chicago last week.

Anthony Thomas' family spent last week at R. H. Thomas' and Anthony arrived to spend the week-end. They live in Leitchfield, Ky.

James Sells has returned from Missouri.

Largest Body of Inland Water. The Caspian sea, which is the largest body of inland water in the world, has an area of about 180,000 square miles.

Many Indiana News-papers

Raise Price of Paper.

Indianapolis, Ind., Aug. 29.—The advancing cost of print paper has caused many of the Indiana newspapers to increase subscription rates. Advertising rates on some papers also have been increased. Among the more recent papers to announce higher prices are: Harmon Times, two papers are Elkhart, two are Cosoen, the Kendallville News-Sun and three weekly papers at Lawrenceburg. Exchange rates have been reduced to the minimum.

Receiver Is Appointed

For Ryman Line.

Nashville, Tenn., Aug. 27.—The Ryman line, one of the oldest steamboat lines operating on the Cumberland river, has been made the subject of bankruptcy proceedings, a petition of involuntary bankruptcy being filed with the clerk of the federal court Tuesday afternoon. Referee Lee Brock appointed C. Boyte Howell receiver for the lines, and he has already taken over the affairs of the company.

LOOK GOOD—FEEL GOOD.

No one can either feel good nor look good while suffering from constipation. Get rid of that tired, draggy, lifeless feeling by a treatment of Dr. King's New Life Pills. Buy a box to-day, take one or two pills to-night. In the morning that stuffed, dull feeling is gone and you feel better at once. See at your druggist.

Point of View.

"I am proud to say," remarked the party with the unbarbered hair, "that I was never intoxicated in my life." "That strikes me, sub," rejoined Colonel Booz of Kentucky, "as being rather an empty honor, sub."

THE Texas Wonder cures kidney and bladder troubles, dissolves gravel, cures diabetes, weak and lame backs, rheumatism and all irregularities of the kidneys and bladder in both men and women. If not sold by your druggist, will be sent by mail on receipt of \$1. (One small bottle is two months' treatment and seldom fails to perfect a cure. Send for testimonials from this and other States. Dr. E. W. Hall, 304 Olive Street, St. Louis, Mo. Sold by druggists.—Adv.

No Cause for Complaint.

"My good man," said the philosopher to the laborer who was amputating weeds from a piece of vacant real estate, "do you ever have occasion to complain of your lot?" "No, sir," answered the honest son of toil. "I don't own this lot."

DEATHS

Robt. Woodall son of Cris. C. Woodall of Repton a mention of whose accident at Sturgis was contained in last weeks paper died at a sanatorium in Evanville Thursday morning at 5 o'clock. The remains were brought here Thursday afternoon and taken to the home of his sister Mrs. David Gass. The funeral and burial were conducted by Rev. John Vaughn of Clay at the Hill Graveyard Friday at 1 o'clock. A large concourse of friends and acquaintances of the family being present. He is survived by his father, step mother 2 full sisters, Mesdames Viola Cleghorn and Allie Gass wife of Dave Gass both of this city and Mrs. Ida Rutherford wife of G. D. Rutherford of Sturgis who is a half sister.

Card of Thanks.

Mr. Editor:--
Permit us to express our gratitude to the many friends who so kindly ministered to us with their prayers, sympathy and help in our afflictions. We are greatly comforted in these and rejoice in having such friends, and pray God's choice blessings upon them.

We would mention especially the constant attention and skillful services of Doctors Hayden & Hayden. "O magnify the Lord with me, and let us exalt his name together."

R. A. LaRue and family.

MARRIAGES

Robt Hughes, one of our most highly esteemed (colored) men married Miss Pearly of Paducah Monday. The Rev. Parker of the Methodist church, at Princeton performed the ceremony at the Methodist parsonage in Princeton. Robt. is a son of the late Joe Hughes who was killed near Marion mill by an I. C. train a few years ago. He and his mother reside on the Cave-in-Rock road and own their home. He is an honest and industrious man and deserves the good wife he has won.

Regular Services to Be
Resumed Next Sunday.

The regular evening services, at the Methodist church, which were suspended, during the extreme hot weather, will be resumed next Sunday evening at 7:30 o'clock and the public are invited to attend.

Lost, Stayed or Stolen.

From my home near Tolu, a sheep and pup. Will pay for its return.
Everett Stone.

FOR SALE

Residence 4 rooms, bath and sun-room, kitchen, etc. on lot 90 by 200 plenty of fruit trees, good location.
M. E. Fols.

Fertilizer.

We will again purchase fertilizer for the farmers of this and adjoining counties this fall. Get our prices before you buy, and we will save you money.

Terms will be cash.

Aunt Petunia Brighten Her Corner

Aunt Petunia's cure for the blues is two breasts of fried chicken, three helpings of lima beans, four ears of country gentleman corn, some hot buttered beets, mashed potatoes and sliced tomatoes with green peppers --with sliced peaches and rich country cream for the aftermath.
Baltimore Sun.

ONE BIG BAR-BECUE AT TOLU

Farmers and Everyone Who Attend
Had a Great Time.--
Successful Meeting

The Tolu Farmers Club pulled off one of the biggest and most successful meetings ever held in Crittenden County, for education and better farming. One of the features of the meeting was a free barbecue, over a thousand people were served with barbecue, pork and mutton, bread and pickles to the hearts content.

Mr. Trice Bennet welcomed the guests with a very appropriate speech, which made every one there feel at home and welcome. The next speaker on the program was Mr. Morgan O. Hughes, of Bowling Green, his subject Farm and the Home. Mr. Hughes brought home to all that heard his vision of better living on the farm. At the end of Mr. Hughes talk the chairman announced dinner. And after an hour had been spent feasting the crowd was again assembled to hear Prof. H. H. Cherry's talk on Education, at the conclusion of which every one realized our crying need of higher education.

Hon. John W. Blue, of Marion, was the next speaker, who made evident the Possibilities of Crittenden county.

The program was concluded by a forceful talk on Hog Cholera by Dr. O. S. Crisler, from the experiment station at Lexington which was very appropriate at this time as cholera has been raging all through the summer around this section of the county. He made his talk more effective by having the organs of a diseased hog taken that day from a farm less than a half a mile from the meeting place.

The day was a success in every respect, all leaving with a sense of the high hospitality and hearty cordiality of the Tolu people. This was the largest crowd ever assembled in the history of Tolu, which is surrounded by the rich Ohio river bottom farms. We are in hope that other towns will grasp the opportunities opened to them to help their brother farmers.

Pig Show

Crittenden Record-Press:

The second annual Pig Show will be held on Saturday, Sept. 2nd, on Main street, and I hope everybody interested in the boys and girls of Crittenden county will attend this show and see just what can be done in the way of raising pork. The judging will be done by a competent man and will begin about ten o'clock. All club members are hereby notified to have their pigs on the street with their pens by eight o'clock (S. a. m.)

Our County Fair will be held in October again and we hope that every farmer will prepare something to show. If everybody helps, we will have a big fair.

Corn Club Boys' Record Books must be in my hands by Sept. 2nd.--J. Robert Bird, Co., Agr.

SEVEN SPRINGS

Born to Mr. and Mrs. Arthur Asbridge, Aug. 13th, a fine girl.

L. K. McClure and Shelly Patton are quite sick at this writing. M. L. Patton and family visited relatives near Emmaus Saturday, and Sunday.

Joe Bell and his two grand children, Ialine and Vernon Patton, went to Paducah Saturday.

Floyd Simpkins and family, of near Emmaus, visited Mrs. M. L. Patton Thursday.

Owen Baz, of Dycusburg, passed through here Thursday. Lawrence Hall has purchased a nice new buggy.

Mrs. Cora Asbridge, of Marion, spent part of last week here visiting her son, Arthur.

Little Glenn Campbell was taken sick at school last week and is still not much improved.

Mrs. Ruby Hard is teaching the little folks at Baz school.

Herschel Wring and family, of near Frances, visited Matthew Henry and family last week.

M. L. Patton, Burklow, Jesse Gress and Jim Holcom, of the Seven Springs church, attended the Ohio River Association at Dyers Hill last week. They report a good meeting and the kind hospitality of the people of that vicinity.

Ben O'Brien and family, of near Tiline, were guests of Tom Patton and family Saturday and Sunday.

Rev. J. C. Kinsolving, of Salem

Farm For Sale

For sale, 165 acres, on Farm's Terr. road near Tolu. Total 165 acres: 40 acres in timber, 30 acres in grass, balance in cultivation; 30 acres in corn and 25 acres in Irish potatoes to be included in the sale. Some fruit, two sets of buildings, good fences and well watered.
\$3120. ISAAC MCWILLIAMS

The Kilpatrick Graveyard.

The people of the community of the Kilpatrick graveyard and those having loved ones buried there will please to assemble Saturday morning, September 2nd, for the purpose of cleaning off said graveyard. Bring the necessary implements to work with. Bring dinner and let us spend the day together. Bring your song books and we will have an hour's religious worship. Jas. F. Price, Com.

The Quinine That Does Not Affect The Head

Children's School Dresses and Women's House DRESSES

SPECIALY PRICED
50c to \$1.50

If there is ever a time when a pleasing selection of school girl's dresses will appeal to mothers it is now, with the school bell ready to ring and day too hot for sewing, it will be easy to choose.

Ginghams or Percales in light or dark colorings, neatly made and finished, are prettily trimmed with pipings and plain colors.

The prices are exceptionally reasonable as these dresses are fast color and will tub easily.

Women desire stylish smart house dresses for morning the same as for other times of the day. We have been very careful in this fall purchase about the quality of material. (Ginghams and percales the way they are cut and will fit, the fastness of the colors and the neatness of trimmings. Special value in every dress at these prices 36 to 44. \$1. to \$2.75.

Good Stock and Valuable Premiums

MOST PROMINENT PERSONS GLAD TO GIVE TESTIMONY

Prompted by Humanitarian Spirit, Men And Women Recommend Tanlac

Men and women who have improper digestion, who are nervous and very irritable because of suffering, lack energy and ambition for their work, are easily discouraged and become melancholy over slight matters, suffer with backaches, poor memory, unsound sleep that does not really rest them, irregular circulation of the blood, dizziness and the common ailments of the stomach, liver and kidneys, many of which are caused by catarrhal affections of the mucous membranes, which long unchecked, finally have weakened the vital organs, will find Tanlac a tonic, tissue builder and appetizer designed to overcome these troubles.

While it is true that the success of Tanlac in some cities has been so great as to amaze certain business men, it really, also, is true that Tanlac is no more popular in one city than another wherever it has been introduced. Everywhere, the most prominent people will give testimony in praise of Tanlac out of gratitude for the relief that Tanlac brings, and because they believe it is their duty to do so.

It is the humanitarian spirit to help the "other fellow" if you can, that is the first thought of many men and women who voluntarily tell what Tanlac has done for them.

Hundreds of thousands have found Tanlac an ideal tonic, tissue builder and strength builder. It reaches those ills of the stomach, kidneys, liver and the common maladies of the day—the strength sapping, lethargy creating ailments that "get your nerve" whether you be merchant or artisan, employer or employee, man or woman.

Tanlac is being introduced in Marion by J. H. Orme. Adv.

Germany Offers Bribe to Keep Rumania Quiet

Bucharest, Aug. 27.—The Epoca announces that Germany has offered territorial compensation to Rumania at the expense of Austria in return for Rumanian neutrality in the war.

To Delinquent Light Patrons

Some parties are in arrears on their electric light bills. Each one is small but in the aggregate they amount to a considerable sum.

We need the money to get in a supply of coal in anticipation of the big R. R. strike about which we see so much in the daily papers.

We can not afford to carry over these light bills. Our rates are so low to permit of any losses from delinquents or bad debts. Please call and get your receipts if you wish to continue using the lights after Sept. 1st.

—Marion Electric Light & Ice Co.

Kincheloe Gets Cannon For Madisonville Court House Yard

Congressman Kincheloe, in a letter to Major F. B. Harris this week, stated that he hoped to be successful in his efforts to secure a cannon and balls for the Confederate monument in the court house yard here. The matter was taken up with Mr. Kincheloe by Major Harris some time ago. Recently introduced a special bill, calling for the donation of this to Madisonville, which passed the house and no doubt will pass the senate. —Hustler.

Seattle Papers Curtail Editions to Save Paper

Seattle, Wash., Aug. 29.—To curtail the consumption of newspaper print paper the Seattle evening papers today eliminated their early morning editions, combining their 9:30 a. m., and noon editions into one edition at 10:30 a. m. Hereafter four regular editions will be issued daily instead of five.

To The Overseers of Public Roads in Crittenden Co.

As a matter of advice to all overseers, I would suggest that you look well to the drainage of your roads first, avoid making hog backs across your roads but make and maintain good and sufficient side drainage. Open up and keep open all side ditches. Keep your roads as smooth and level on the surface as possible. The roads thus maintained will by use become compact, hard and smooth. Hoping that all will heed and profit by this suggestion, I am most respectfully your obedient servant, John G. Asher, Co. Judge.

This Man Teaches That Courtesy Pays

In the September American Magazine, a writer tells about David Gibson, who is called the

original courtesy man. Mr. Gibson has done more than any other individual towards teaching railroads and other great corporations the importance of courtesy. Mr. Gibson's resolution is: "Resolved: That we all cease trying to get something for nothing—grafting, in other words; that we all do just a little more than we agree to do, rather than just a little less. That honesty is a question of efficiency here on earth, with its rewards in profits now, here on earth. That fear is the root of all evil; for if our neighbor cheats us in his store it is to fortify himself against some element out of his store. That the basis of all life is business life; that business is the system by which we supply our wants and needs; that we are true to political life, true to social life, as we are true to business life. That we think of others as we would have them think of us; that we do as we think, the thought precedes the act; that co-operation is the real brotherhood of man; that the prosperity of one man does not require the poverty of another man; that both the idle man and the dishonest man, whether they be possessed of little or much, are fools in themselves and abominations to their communities."

Cures Old Sores, Other Remedies Won't Cure. The worst cases, no matter how long standing, are cured by the wonderful, old reliable Dr. Porter's Antiseptic Healing Oil. It relieves Pain and Itches at the same time. 50c, 1.00, 2.00.

Aeroplanes as Life Savers

Powerful Flyers Some Day Will Be Used to Guard Property and Lives of the Nation in Peace as Well as in War.

By REAR ADMIRAL ROBERT E. PEARY
Chairman National Aerial Coast Patrol Commission

I have laid down the axiom that aeroplanes are life savers as well as life wasters, and that their real mission in this complicated age of ours is for the former service primarily, its services for the latter use being only as a necessity in time of war.

Even as a war machine, however, the aeroplane, both of the land and water variety, saves the lives of its people in direct ratio to its success in keeping hostile invaders away. This is specially true of a peaceful nation like ours, whose military and naval power, even if greatly augmented in the near future, will be used for defense only, and not to aid inexcusable territorial aggrandizement.

The great value of aircraft as a life saver on water, as illustrated by the aero coast patrol system advocated by our National Aerial Coast Patrol commission is acknowledged. Let us now consider briefly the coming activities of the aircraft on land.

One of the great uses for aeroplanes in the near future will be as fire fighters. The time is almost at hand when giant planes, larger than any we know of now, and with a speed greatly above the average of 85 to 100 miles an hour which prevails at the present time, will be equipped essentially like land fire apparatus. Rushing without hindrance through the air at 150 to 200 miles an hour, carrying fire-fighting apparatus and experienced firemen, fully equipped aerial fire departments will dash toward the buildings on fire, and extinguish the flames with chemicals long before the fire department of these times could get half way to the blaze. In fact, it will be done easier for the reason that the modern skyscraper is hard to save if the fire gets a good start, and great, and sometimes fatal, delay due to getting up to the fire if it is on the upper stories.

To the aerial fire department this will be no difficulty at all. The sixtieth, seventieth or eightieth story, or the fifty-seventh floor in the Woolworth building in New York, will be just as easy to fly to as it is for the land fire fighters to get up to the eighth or ninth floor.

No later than June 2, Walter Niles, the aviator who has just returned from a triumphal tour of Japan and China, while flying over Miesola, near New York city, saw that the dwelling of a citizen was on fire before anybody else even knew about it. Niles flew to the conflagration and maneuvered around and above the house in such a way that the alarm was communicated to people in the street and the fire was soon put out. If this can be done merely as an incident to a little air jaunt in the afternoon, it is not difficult to believe a great deal more can be accomplished by a full-fledged fire department.

Aeroplanes will also fly at tremendous speed from one city to give aid to a neighboring city in distress. They will be fire fighters if that is what has been called for by S. O. S. appeals, or they will be big and fleet trucks carrying supplies and a little army of helpers.

Suppose, for illustration, that another disastrous conflagration should spring up in the city of Baltimore when aerial fire departments are a reality. In half an hour aid would be there from Washington nearly 50 miles away, an hour later the Philadelphia machines would be on the scene, and after another hour the whirr and the clang of the New York contingent would be heard in the air.

Take another illustration. Let us imagine a repetition of the Dayton flood. The loss of life and the bitter distress caused by that disaster would not be repeated, for powerful flyers bearing life lines, clothing, bed covering, first-aid packages, medicines and everything else needed would be on hand in a very short time from her neighboring cities in Ohio, and from a resourceful metropolis like Chicago or Indianapolis.

These instances might be multiplied at great length, and to a point tiresome in detail. Indeed, there is hardly a life saving function exercised on land that cannot, and will not, be done much better and much faster by air.

Everything will not come at once, to be sure, but aeronautics is developing with such remarkable celerity in this and most all other countries that the germ of the foregoing suggestions has already passed the nebular stage, and before the present generation has gone to its reward many of these things will have come to pass.

Billy Sunday No Pacifist

God is a God of war, as well as of peace. We must fight as well as pray. If it hadn't been for war we would be singing "God Save the King" instead of "My Country 'Tis of Thee;" if it hadn't been for war the bloodhounds would be chasing the black men through the swamps and canebrakes today; if it hadn't been for war Spain would still be tearing at the heart of Cuba; if it hadn't been for war the flag of Mexico would be waving over Texas, New Mexico, Nevada and California. Yes, I believe in preparedness; I believe in battleships and submarines, and if any of the nations across the sea should care to find out whether the American people believe in the Monroe Doctrine, let them start something. If they do, I would like to be colonel of a regiment.—"Billy" Sunday, the Evangelist.

Always Disregarded History

If the European war enables us to read aright the true lessons of our own history, it will serve our nation well. We have always misread or disregarded the military history of the United States. So great is the present conflict, however, that it is hoped that our eyes may be opened. It seems impossible that we can hear the tramp of the millions of trained soldiers in Europe or the rumbling of the thousands of cannon, without a last awakening.—Richard Stockton, Jr.

The Cost of Unpreparedness

Every battlefield of the war of 1861 gave proof to the world of the valor of the disciplined American soldier; but in achieving this reputation the nation was nearly overwhelmed with debt, from which we are still suffering, while nearly every family in the land was plunged into mourning.

DON'T OVERLOOK THIS

A Careful Perusal Will Prove Its Value To Every Married Reader.

The average man is a doubter, and there is little wonder that this is so. Misrepresentations make people skeptics. Now-a-days the public asks for better evidence than the testimony of strangers. Here is proof which should convince every Married reader.

William Redd, farmer, Marion, Ky., says: "I have a severe pain in the small of my back and my back ached and felt lame in the morning. I tried very easily and was nervous all the time. The kidney secretions were too frequent in passage and contained sediment. Hearing Doan's Kidney Pills highly recommended, I began using them. I was helped almost at once."

OVER FOUR YEARS LATER, Mr. Redd said: "I haven't had to use Doan's Kidney Pills since I last recommended them. But I keep them on hand for relief, if I happen to catch cold or overwork my kidneys."

Price 50 cents at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Redd has twice publicly recommended. Foster-McMillan Co., Props., Buffalo, N. Y.

Paducah Sun's Daily Thought.

"Never lose heart over a mistake. If the best men's faults were written on their foreheads many men would pull their hats over their eyes."

SPECIAL NOTICE

In regard to OBITUARIES, RESOLUTIONS OF RESPECT, SCHOOL NOTICES AND

On account of the great advance in the cost of all materials connected with the running of a newspaper we have adopted a new rule in regard to obituaries, resolutions of respect, cards of Thanks, School notices, etc., whether written personally or for lodges, churches, schools or individuals, and that is, we shall charge at a rate of one cent per word for all such articles.

The amount, in cash or stamps, must accompany each article, or it will not be printed. The heading and the signature both count. This ruling applies to everybody alike, without any discrimination.

Contributors please remember. CRITTENDEN RECORD PRESS.

She's Pure Gold—When This Girl Proposed She Said:

"And I have tried to make it clear to you in every way I knew. I've asked you this house, times without number. I've played tennis with you, and walked and talked with you, and ridden your rounds with you in your bumpy old milk wagon. I've simply thrown myself at your head, day after day. But you—you wouldn't understand. You wouldn't look at me. Nor listen. You moaned about, and moped your ridiculous heart out. Because you thought I was such a blind, silly fool, I couldn't look past your poverty and your ill-luck, and see how splendid you really are. Because you thought I was such a stuck-up simpleton I did not want to marry you, because you were a milkman. When I'd drive your milk cart, I'd chase the cows for you, if you wanted me to."—September Woman's Home Companion.

For Sale

A small farm (43 acres) on the Marion and Fredonia road one mile south of Cayne, 3 room house, good orchard, spring and well, stable and tobacco land.

O. C. Cook, Marion, Ky.

Corn Wanted

We will pay 50c for white shucked, clean, second corn delivered at our mill.

Baker & Mayes.

Slip a few Prince Albert smokes into your system!

You've heard many an earful about the Prince Albert patented process that cuts out bite and parch and lets you smoke your fill without a comeback! Stake your bank roll that it proves out every hour of the day. Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

There's sport smoking a pipe or rolling your own, but you know that you've got to have the right tobacco! We tell you Prince Albert will bang the doors wide open for you to come in on a good time firing up every little so often, without a regret! You'll feel like your smoke past has been wasted and will be sorry you cannot back up for a fresh start.

You swing on this say-so like it was a tip to a thousand-dollar bill! It's worth that in happiness and contentment to you, to every man who knows what can be gotten out of a chummy jimmy pipe or a makin's cigarette with Prince Albert for "packing"!

PRINCE ALBERT

the national joy smoke

R. J. REYNOLDS TOBACCO CO.
Winston-Salem, N. C.

This is the reverse side of the tin of the red tin.

THE Prince Albert tin, and in fact, every Prince Albert package, has a real message to you on its reverse side. You'll read—"Process Patented July 30th, 1907." That means that the United States Government has granted a patent on the process by which Prince Albert is made. And by which tongue bite and throat parch are cut out! Everywhere tobacco is sold you'll find Prince Albert awaiting you in every red bag, 5c; red tin, 10c; handsome round and half-pound tin humidor and in that clear crystal-glass humidor, with sponge-moistener top, that keeps the tobacco in such fine condition—always!

That "Lost", "Strayed" or

"Stolen" Sow.

We understand the interest of parties are on the right track to recover the fine sow, which was advertised as "Lost", "Strayed" or "Stolen" and the officers know which it was and that's the best part of it. Just wait a few days and we'll report further. A Reader.

For Rent Sept. 1st

My house now occupied by Charles McGregor on Walker St. P. G. Cox.

IN SOCIETY

Miss Annie Louise Dean entertained a jolly house party, last Thursday at her home at "Hazeldeane" in the Fredonia Highlands near Crider, Ky., in honor of her guest, Miss Robbie Douglass Wilson of Cadiz, Ky. Among those bidden were: Misses Virginia Blue, Isabel Gross and Linda Jenkins of this city, Mary Dyer and Lemah James of Louisville, Dorothy Rat-

cliff, Dale J. Mason and Melville Aiken of Princeton, Miss Henry of Arkansas, Misses Guess and Turley of Crider, all of whom attended excepting Miss Linda Jenkins who was unable to go, much to her regret. Miss Dean served her guests with a buffet luncheon at noon which was an invitation, quite delightful and highly enjoyed. She will leave for Paducah to assume her duties in the Paducah High School in a few days.

A HACKING COUGH

WEAKENS THE SYSTEM

Don't suffer with a hacking cough that has weakened your system—Get a bottle of Dr. King's New Discovery, in use over 10 years, and benefiting all who use it, the soothing pine balsam with tar that the cured air-passages soothe the raw spots, loosen the mucus and prevent coughing. Dr. King's New Discovery induces natural sleep and aids nature to cure. —

To Every Confederate Veteran

In State of Kentucky.

The Hon. Mat Cohen, Commissioner, and the State Board of Agriculture and the Louisville Board of Trade have united in a cordial invitation to all Confederate Veterans to be present at the State Fair at Louisville on Sept. 12th, 1916, which is set apart as "Governors' and Military Day." They desire your attendance in order that they may show you are held by these organizations and the citizens of Kentucky generally.

I therefore urge that every Confederate Veteran in the state who can do so accept this invitation and attend; and to further show our appreciation of this invitation it is hereby ordered that every one who attends meet me at the office of Hon. W. J. Gooch, Secretary of the Fair, promptly at 11 o'clock A. M. September 12, 1916, and join in a short parade across the arena accompanied by bands playing National airs.

Come and be sure to wear your uniform, Confederate button, or Camp Badge, one or all, and let us have a good day together at our great State Fair.

W. J. Stone, Maj.-Gen'l. Comd'g. Ky. Div. U. C. V.

GLENDALE

(Delayed from last week.)

Miss Jean Rankin, of the Ford's Ferry section, was the guest of Mrs. W. L. More last week.

Corbet Kirk, of the Caney Fork neighborhood, is a frequent visitor at the home of Andrew Hughes.

Mrs. J. P. Hatcher and daughter, Christine, visited her aunts, Mrs. W. G. Condit, in the Oak Grove neighborhood, and Mrs. W. T. Terry, near Forest Grove recently.

Mrs. Lammie Clark has purchased a new piano.

Howard Hurley is visiting relatives at Harpersburg and Equality, Ill.

Rodney Stephenson and wife left last week for Madison, Ill., where he has accepted a position with a telegraph company.

Cecil Jennings and family attended church at Piney Fork the first Sunday.

Jackson Winders and Barnett Best, of the Colon section, attended Sunday School here Sunday, August 13th.

Hugh McConnell, of Arkansas, who motored over to Kentucky to visit his cousin, James McConnell, of near Harpersburg, was the guest of Miss Edith Sweeney Sunday.

Protect your credit.

Money to loan on farms,

from \$1,000 up.

From 5 to 10 years.

Interest averages 7 per cent.

GEO. M. CRIDER,

Financial Correspondent

Marion, Ky.

Use of Water Power Means Boon to Prosperity of the Nation

By FRANKIN K. LANE, Secretary of the Interior

IN the marvelous material progress made by civilization during the last century the greatest single factor has been the substitution of mechanical energy for human labor. In proportion to the degree in which man is relieved from the necessity for devoting himself to the mere struggle for material existence, there has been and will be measured the advance of art, science and philosophy, literature and the better things which make for the higher and nobler life of a nation or of the world.

We are living today in the dawn of an age in which power is the basis for our material progress. The productive abilities of our 100,000,000 people are increased by the use of probably 125,000,000 horse power of mechanical energy, not including the animal power furnished by 30,000,000 horses and mules. Most of the mechanical energy is used in the form of electrical current. When applied to industrial uses one electrical horse power does the work of ten men without tiring.

Increasing Men's Productivity.

Conservation of human labor goes hand in hand with utilization of mechanical energy, and utilization of that form of energy most cheaply and least wastefully developed accomplishes the maximum in freeing man from muscular toil and increasing his productivity. In the last decade we have harnessed for our utilities and industrial needs something like 6,000,000 horse power of water.

This accomplishment stands for real progress, but, as compared with our possibilities, it is not such progress as we should have obtained. Although we are utilizing today 6,000,000 horse power of water, we are annually, daily neglecting and wasting ten times that amount, largely because of our inapplicable laws, since most of the water powers not in use are under government control, and the present laws do not adequately make provision for their fullest development and use. There is no house in the United States enough water power to equal, if harnessed to the wheels of industry and used continuously, the daily labor of 1,500,000,000 men, or thirty times our present adult population.

This bonanza of our water powers is a significant illustration of the opportunities and possibilities of the future of America. It is equally significant of the lack of intelligent development of resources, employment of opportunity, and coordination of effort which has, to the present time, marked our political and industrial growth.

Only the Surface Touched.

We have \$200,000,000,000 of accumulated wealth, but we have mined only the surface of our natural resources. Many times two hundred billions of wealth lie beneath this carelessly scratched surface awaiting only the coordination of capital, labor and statesmanship for its realization.

And in this development and utilization of natural resources, particularly of water powers, we have, for some good reasons and some not so good, fallen behind the rest of the world. While we are bickering over terms of legislation to make our water powers available, other countries have developed their powers and with them created vast new industries based upon scientific discovery and invention, of which we have none.

We are depleting our fuel supply in the manufacturing sections of the East and Middle West, while in the far West are mountains of undeveloped raw materials adjacent to unused water powers whose development would mean the establishment of great new industries in new manufacturing centers.

We are suffering from lack of fertility in the soil, and the utilization of our water powers for irrigation and for the development of hydroelectric power would mean the establishment of great new industries in new manufacturing centers.

Millions of acres of lands rich in plant foods lie idle and waste in the western country which can be converted into fertile and productive farms, gardens and orchards merely by pumping onto them the waters of the streams flowing through them. This miracle of making the desert bloom awaits for accomplishment only the laws which will permit capital and enterprise to engage in the harnessing of these streams so that they can pump themselves onto the thirsty soil.

Complete Preparedness.

Behind a complete preparedness, whether industrial or military, must be the complete machinery of an indus-

trial nation's life. Today we produce most of the commodities which make for this preparedness. To produce the others is very largely a matter of developing those resources we have neglected, and in the forefront of these neglected resources are our water powers.

Such development will open to the West an industrial era of such possibilities as have been almost undreamed of. The fuels available include natural gas, oil, lignite and coal. The coal, reduced to coke, offers raw material for the production, by electric smelting processes, of the carbide extensively used for illuminating purposes. Here at hand are great deposits of limestone that will furnish the lime required to form calcium carbide used in the fixation of nitrogen and the production of ammonia. At hand, also, are mountains of phosphate rock awaiting the installation of appliances to free its content of phosphoric acid and combine it with ammonia as a fertilizing agency at less cost than any now known.

Sodium sulphate, sodium carbonate and sodium chloride are here, the latter offering material for electro-chemical production of soda, bleaching powder, etc., in time of peace and for the making in wartime of the deadly chlorine gas now devastating the trenches of European battle fields.

Abundant Iron Deposits.

Iron deposits are here in abundance, which, with fluxing and reducing materials at hand and cheap hydroelectric power as the agency for reduction, may make the Pacific Coast a competitor with the Ohio Valley in the production of special grades of pig iron and the manufacture in electrical furnaces of high grade steels. Also at hand are the materials for the manufacture of such steel alloys as ferromanganese, ferrochrome, ferro-silicon, ferrotungsten, ferromolybdenum and others. Here are rare metals—barium in the form of sulphate and carbonate, zinc and copper, gold and silver—all awaiting the magical touch of the cheap electrical potentiality in our wasted stream flow to make their utilization the basis of new settlement, new towns and cities, new centers of civilization and new sources of activity and wealth.

As a by-product, and not an unimportant one, of the atmospheric nitrogen plants, we can produce cyanide, giving new life and impetus to the mining and production of precious metals from low grade ores. In fact, this material either as by-product or from metallic sodium produced with the cheap power available, should make the Pacific Coast the logical distributing center for cyanide used in gold extraction. Our Alaskan copper, now shipped as far away as New Jersey for smelting, may be cheaply and profitably reduced and manufactured by electrical processes on the Pacific Coast, and the same hydroelectric power which will bring these industries into existence will afford the energy for cheapened transportation of their products over electrified railways.

Security of Investment Needed.

We must depend upon private enterprise and capital to secure this development. To enlist private enterprise and money in the work, our legislation must offer to investors, to promoters and builders, the security of investment and hope of reasonable reward or return which will induce them to put their money and brains into these enterprises. The door must be securely locked against exploitation of the public need and speculation in future values of these power sites, but there must be no improper barriers or handicaps to enterprise and development.

Production of cheap power depends as largely upon the securing of investment at low rates of interest as upon economy of physical operation. If the legislative conditions are such as force capital to earn large returns it necessarily means higher priced power and eliminates many of the desirable uses to which cheap power could be put. If it is economical to combine more than one water power under a single operating control or with one distributing system which will increase the percentage of generating capacity utilized and so reduce the unit cost, neither mere prejudice nor political timidity should be allowed to prevent such economical operation.

The big things which should not be lost to sight are that use constitutes the highest form of conservation of water power; that power not used today does not diminish the potential value of the same power for use in the future, while every kilowatt of electrical energy produced by water conserves human labor or adds to its productivity and is the equivalent of a fuel saving which closely affects not only present day industrial and social conditions, but future cost of living as well.

HOPKINSVILLE TO BE MECCA FOR TRAVELING MEN

FIVE HUNDRED AND MORE TO ATTEND PENNYROYAL FAIR SATURDAY, SEPT. 2ND.

Gov. Stanley And Congressman Kincheloe To Speak And Ride In The Mule Derby.

The committee in charge of Traveling Men's Day at the Pennyroyal Fair are very much encouraged as to the outcome for the big gathering of drummers on Saturday, September 2nd.

Not only have the local men been spreading the news, but nearly every traveling man in Western Kentucky has been interested in publicity to the big meet and in all towns are to be found attractive posters telling of the big day.

Men will come from Paducah, Nashville, Louisville, Henderson, Madisonville and many other towns where traveling men make headquarters and the prediction has been made by the local committee that the visitors to the Pennyroyal fair will number five hundred strong and that the gathering will be the largest gathering of traveling men yet assembled in Western Kentucky. Nothing but fun will be pulled off that day. Mules will be provided for all who enter the Derby and harness event and those who are not furnished saddles will ride in the Derby bareback. The speakers of the day will be Gov. Stanley and Congressman Kincheloe. These two Traveling men have both entered the Derby and the harness race.

The trip to the fair grounds will be made in automobiles and the parade will be headed by the celebrated Metropolitan brass band.

The start will be made at 10:30 o'clock from the Latham hotel. Numerous events will take place during the day and the winners will be awarded handsome prizes.

SWEET CLOVER SEED

Direct from grower. White and bluish yellow; hulled and unhulled. Special scarified seed for fall sowing. Also pure sweet clover extracted honey. Prices and circulars sent free.

JOHN A. SHEEHAN,

R. D. NO. 4, FALMOUTH, KY.

Isn't It So?

A husband usually hangs around the house too much or not enough to satisfy his wife.

"Understand he had no insurance." "Not a penny!" "Suppose you're insured all right?" "You bet! Dollar for dollar." "What's the name of your company?" "Blessed if I know! Left that to the agent."

"You don't know the name of your company, nothing about its financial resources, nothing about its reputation for fair dealing, nothing about how promptly it settles losses—and yet you're quite sure you are safely insured!" "By George, I never thought of all that!"

"Well, you should. And if you aren't absolutely satisfied, look up the record of the Hartford Fire Insurance Company. Hundred and four years in business. Has always settled every honest obligation on the spot. That's my company—the old, reliable Hartford."

And that's the company we represent.
